

Leeway Overlee (LO) Civic Association (CA)
Minutes of General Membership & Community Meeting
Wednesday, January 17, 2018 - 6:30pm at Walter Reed School Gymnasium

1. Given strong community interest in the [new elementary school](#) to be built at the existing Reed School at [1644 N. McKinley Road](#), the presentation of Reed School construction options at the community meeting on that topic served as Leeway Overlee's winter meeting. The presentation of options was made by the architectural design firm, [VMDO](#), and was followed by a question and answer session.

2. Strong opinions were expressed regarding the three options outlined by the VMDO architects, particularly with respect to impacts on green space, traffic, parking, and local business. The great majority of folks attending who spoke expressed preference for what was called the Integrated Scheme concept design for the new school. This scheme plus two others were also outlined to the members of the Building Level Planning Committee (BLPC) and [Public Facilities Review Committee \(PFRC\)](#) for this project at their joint January 10th meeting. These three designs can be seen beginning on slide 37 of 56 of the PowerPoint presentation posted on the [APS website](#).
